

### Hydraulic Modular Trailer

For transport of undetachable, oversized and overweight cargos, SHANGHAI RUIQIANHE offer a combination system, Heavy-duty hydraulic modular trailer. This modular system provides almost unlimited possibilities to solve simple as well as complicated transport tasks. The individual platform modules can be combined in longitudinal and lateral direction. It possesses some advantages, such as adjustable platform, axle load, small turning radius, easily moving backward, and so on. Adjustable body keeps the horizontal level while running on the upper and lower ramps, and guarantees the running vehicle is smooth-going, steady and safe.

Model type	Platform Width (mm)	Wheelbase (mm)	Platform Height (mm)	Platform Min. Height (mm)	First wheel Max. Steering Angle	Platform Type	Axle line No. / Module
A	2990	1550	1070±300	770	50°	Gridding	2-7
A1	2990	1550	1080±325	755	55°	Flatbed	2-7
B	3400	1600	1070±210	860	45°	Gridding	2-7
C	3000	1500	1175±300	875	55°	Flatbed	2-7

Rated load: 22.5T/Axle-line (Normal speed), 32.5T/Axle-line (1km/h)
